

Query: Who supplied the Coal Handling Plant at Stroud Gas works?

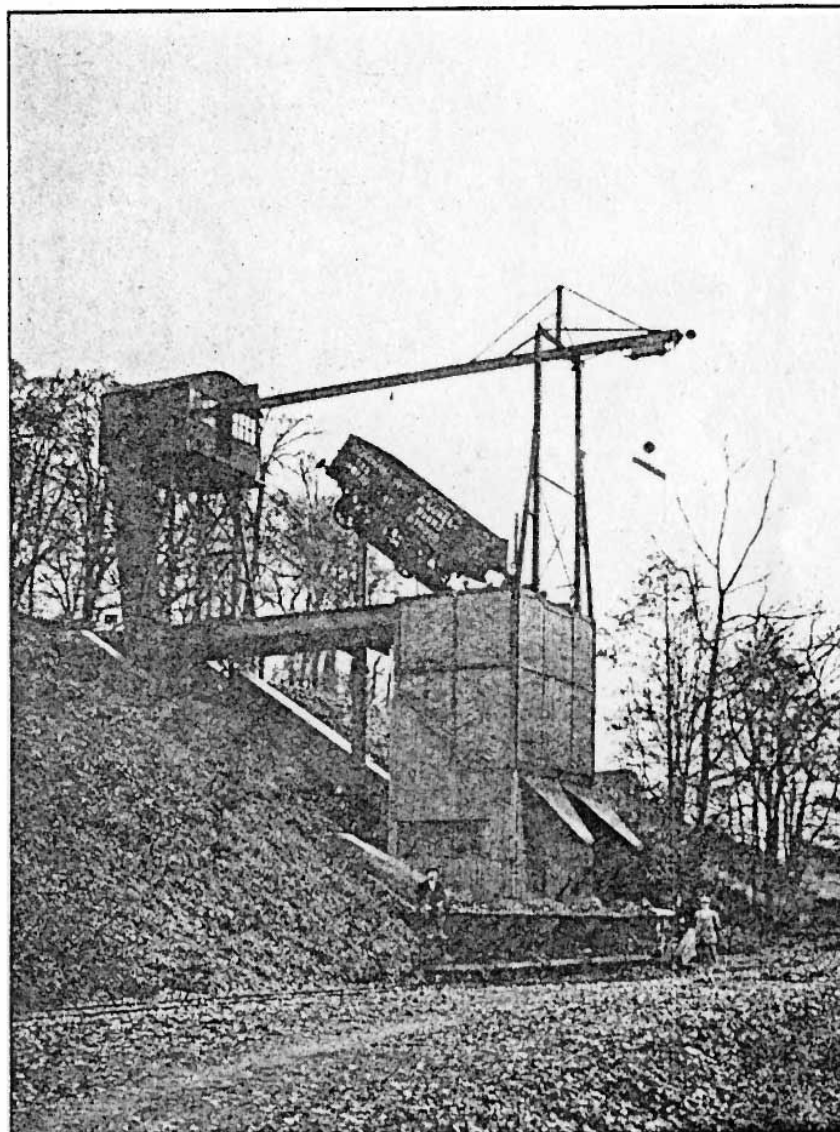

4 June 2020

To GSIA Members

The item on the coal tip at Stroud Gas works created quite a bit of interest and so it is worth posting another image below which appeared in a 1933 history of the Stroud Gas Company (formed in 1833).

Although the copy is not good it does give a very good idea of how the tip was operated between about 1925 and 1956 when the works closed.

We would like to learn more about the structure. The caption says "West's" as though this may have been the manufacturer. All ideas welcome!

Coal Handling Plant at Siding,
showing Wagon Tipper (*West's*) 1925.
